FEATURES & BENEFITS

FAST CURE Rapid turnaround time* under normal conditions for foot and vehicle traffic. **

IMPACT & ABRASION RESISTANT Excellent abrasion and impact resistance.

LOW ODOR Lower odor than most polyaspartics.

CHEMICAL RESISTANT Excellent chemical resistance.

LOW TEMPERATURE CURE Will cure in temperatures as low as -40°

PEEL RESISTANT Resistant to all peeling, including hot tire peel resistant

HIGH FLEXIBILITY Passes a 90° Mandrel bend test.

HIGH TEMPERATURE RESISTANT Tolerant to 150°C for random, incidental heat contact

UV RESISTANT Industry leading UV resistance, non-yellowing and high gloss characteristics

COLOUR OPTIONS Multiple flooring colour options to match your ascetic and decor

LOW VOC Ultra low VOC and also in zero VOC formulation for restricted areas where adequate ventilation does not exist.

EXCELLENT ADHESION & BONDING Bend to virtually all substrates of any dimension, including metals, concrete, fiberglass and wood.

SLIP FREE TRACTION Enhanced formula provides superior traction compared to traditional epoxy coatings

HIGH ELONGATION Will stretch 100% of its own dimension to prevent crack re-appearance.

*In Warmer Temperatures (April to October): Return to light foot traffic in 12 hours and wait 24 hours for everyday use. Return garage contents to their new organized space in 48 hours. Return to vehicle traffic in 96 hours.

**In Colder Temperatures (November to March): Return to light foot traffic in 12 - 36 hours and wait 24 - 48 hours for everyday use. Return garage contents to their new organized space in 48 - 72 hours. Return to vehicle traffic in 96 - 120 hours.

Weather and environment conditions may cause curing times to vary. Please consult a Rock Solid Coatings expert.

Elevate your concrete floors with our Signature Flake Collection, designed to deliver both exceptional durability and captivating aesthetics. These seamless, easy-to-maintain flakes combine stunning beauty with practical performance. Formulated with a zero-VOC, water-based chemistry, our flakes ensure superior flexibility and strength, guaranteeing long-lasting performance in any environment.

OUR PROCESS

QUARTZ BENEFITS

Our Quartz flooring aggregate is expertly engineered to create seamless, non-porous surfaces in high-performance flooring systems, delivering exceptional durability and easy maintenance. Spills clean up effortlessly while resisting mold and bacterial growth, outperforming traditional options. With superior resilience to harsh chemicals and UV radiation, Quartz flooring ensures long-lasting performance in the most demanding environments.

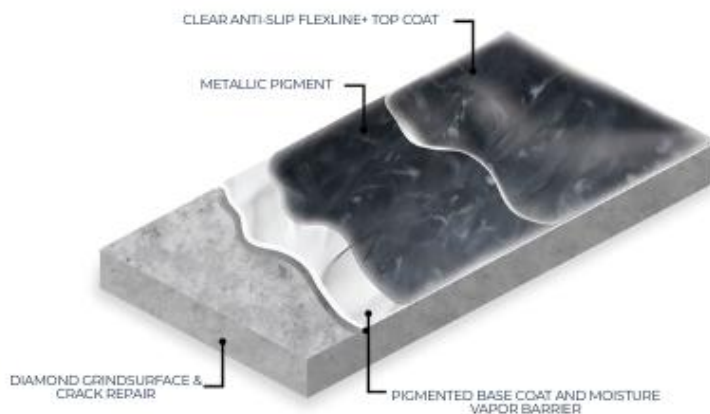

Our advanced Quartz system features a double-broadcast application, incorporating two layers of premium quartz granules to maximize longevity. This approach significantly enhances durability and resilience while delivering a seamless, visually stunning finish that surpasses the aesthetic appeal of a single-broadcast system.

Additional colour blends are available, subject to approval, minimum quantity requirements, and lead time for production.

Our Metallic pigments seamlessly blend into our high-performance coatings, crafting vibrant, unique color patterns with a pearlescent finish. This smooth, durable surface combines flawless protection with a striking decorative statement, achieved through dynamic light interference and absorption for a dramatic colour effect.

OUR PROCESS

DESIGN OPTIONS

The design possibilities of Metallic floors are endless. Use multiple colours to create unique effects and colour patterns, or, use one colour for a more subtle appearance.
